About Spanesi Americas:

Spanesi Americas is a company created with the same passion and expertise Spanesi SpA has become known for globally since 1989. Spanesi Americas' mission is to bring new products and technologies to body shops in the Americas to enable technicians to perform repairs to a high standard of excellence.

Spanesi SpA is the leading international producer of automotive repair equipment and manufacturer of effective body shop solutions. Spanesi's product lines include: Straightening Benches, Multibenches, Touch Electronic Systems, Vacuum Systems, Welding Machines, Infrared Lamps, Lifts, Painting Tools, Spray Booth Equipment, and Manual, Pneumatic, Electric, and Hydraulic Tools.

For more details about Spanesi Americas products and solutions, contact Timothy Morgan, Managing Director, 123 Ambassador Drive, Naperville, IL, 60540, 1.224.SPANESI (772.6374) tmorgan@spanesi-americas.com, www.SPANESI.com.

WHERE THE BODY SHOP PROJECTS BECOME REALITY

To study, to plan and to organise the bodyshop. The importance of lay-out and know-how.

To be a consultant for the customer means to know how to create and how to plan the body shop.

For this reason Spanesi has created a technical office of planning, with the only purpose to realize complete layouts, for technological solutions which were planned keeping in consideration energy saving and environment protection.

The projects realized by Spanesi are clear and understandable, thanks to the use of the last software technologies, which allow to have the maximal visibility of the structure and of the included equipment.

*Thanks to our direct experience on the car repairation, it's easy to propose to our customers the **right solutions**.*

ONLY ONE PARTNER: SPANESI

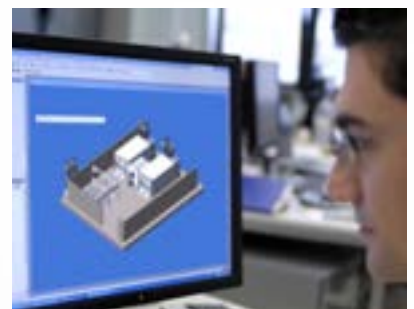

We are the only company able to supply a turnkey bodyshop: everything except the walls!

*The advantage of having **one reference**, most of all when planning a new body shop, is fundamental.*

Spanesi thought about this because the customer never has to lose sight of the only important thing: the satisfaction of having the own dream realized.

We help the customer understanding his needs, beginning from the initial project, guiding him in all the phases, up to the body shop opening.

Fortified by its complete range, Spanesi offers everything you need for the body shop.

SPOT REPAIR

Designed specifically for the capture of live sparks, embers and combustible dust, like aluminium and titanium, the Barracuda's powerful vacuum motor draws air and collected particulate into the immersion tank, and forces it through a roiling water bath, instantly quenching sparks, and thoroughly wetting dust out of the airstream. Three stages of additional filtration ensure that the air exhausted from the system is dust and moisture free.

When its time to empty the tank, simply pull the valve lever to dump the water and debris out through a filter sock and into any floor drain. Once the tank is empty, connect the system to a normal garden hose and a series of spray heads inside the unit continue to flush the tank, ensuring that no sediment builds up on the internal components. The large window makes it simple to confirm the water level in the tank, and allows spectators to view the carnage as dust and debris gets consumed by the Barracuda.

Features:

- * 2 Users
- * All stainless steel construction will never rust
- * Multi nozzle internal wash down system keeps the unit clean
- * Large window to monitor water level and vacuum activity
- * 4 stage filtration system ensures dust containment
- * Drain filter for easy collection and disposal of sludge

Flexible air tube Ø 29

External height 3,80 m / internal 3,54 m

External width 5,10 m / internal 5,00 m

External length 8,10 m / internal 8,00 m

Single frontal with 4 wings with "maxi" glazed windows (useful passage: width. 3,6 M - h 3,51 m)

Self-supporting structure by galvanized prevarnished white ral 9003 sheet

"Sandwich" type with insulation with glass wool (thickness 52mm)

Ceiling filter to input air

100% Polyester fiber thermofixed - thickness 20mm - weight 200gr/m²

Filtering 90,1% -storage capability 494 gr/m²

Conduct to flame b2 din 4102 teil 1 (self-extinguishing)

ALUMINIUM BAY type 3

Lighting with 2 rows of lights by built-in ceiling fixed between perimeter panel and roof - no. 8
With 4 tubes x 58w each + no. 4 With 4 tubes x 30w each
Wide customization in terms of lateral service door, storage cabinets and possible glazed windows (normal or "maxi") on perimetral panels

Vacuum channels with a floor surface filter (double filter)

1) Metallic mesh layers made of knit-cuspided aluminium - class eu2
Thickness 10mm - filtering 65% -
maximum operating temp. 200° C
Recommended final pressure drop 150pa
- related humidity maximum 100%

2) Medium progressive type polyester -
reaction to fire f1 din 53438 - cl. Eu4
Thickness 23mm - filtering 90% -
maximum operating temp. 100° C
Recommended final pressure drop 250pa
-related humidity maximum 100%

ALUMINIUM BAY type 3

Nr. 2 Electric centrifugal - 0,37 kw - 1400 rev / min (230/400v 50hz - atex)
Control panel for lights and ventilation
(Fans power on delay of a few seconds than turning on lights)

Vacuum unit mod. 3B for aluminiumo 3 kw with antistatic filters

Column "trial" with integrated system of dust suction, electrical power and compressed air

ALUMINIUM BAY type 3

Scissor bench 5m "tiger" with lift (h max 1550 mm - portata 5000kg)

Control box 400v 3f 50hz 2,2kw for infloor bench

Racks for 5m spanesi bench

Universal jig "superstar" with no.6 Cross bars length 1800mm. No.10 Sliding supports and trolley with accessories. Cd-rom winstar and semestral user licence of data sheets

Mcperson measuring system for shock absorber and comparative measurements

Pulling column with pulling kit 6t c300

Loading trolley for lift series 100 with sl170

Kit 5mt. Ramps + pneumatic springs for cover hollow on tiger infloor

Kit of 12 positioning platforms for tiger infloor

Couple of blocks for trolley for tiger and 106 embedded benches (complete with sliding support plugs)

ALUMINIUM BAY type 3
